# To **Whom It May Concern**

It is with great pleasure and enthusiasm that I write to support Mr. Bogahage Chamara Sandaruwan Sudasinghe's application to the postgraduate program .

I have had the privilege of knowing Mr. Chamara for five years, both as his course lecturer and, in my capacity as the former Head of the Department of Physics, as a student and a temporary laboratory demonstrator. He was one of only thirteen exceptional students selected for our rigorous four-year BSc Honours Degree in Physics, out of a cohort of approximately eighty students. Admission to this prestigious program is highly competitive, based on academic performance in Physics, Applied Mathematics, and Pure Mathematics during the first two years of study at the University of Jaffna.

Mr. Chamara consistently demonstrated outstanding academic achievement throughout his undergraduate studies. At the conclusion of the program, he graduated with a Second-Class lower Division Honours and an impressive overall GPA of 3.19 out of 4.00. I would like to highlight that Mr. Chamara was one of the most diligent and capable students in his cohort. The BSc Honours Degree program he completed was conducted entirely in English, and Mr. Chamara's communication skills, Listening, Reading, written and oral, are excellent. His written work is consistently clear, concise, and engaging. Furthermore, he recently sat for the IELTS examination, achieving an overall band score of 6.5 out of 9.0, with individual scores of 8.0 in Listening, 6.0 in Reading, 6.0 in Speaking, and 5.5 in Writing.

During his undergraduate studies, Mr. Chamara exhibited outstanding research acumen through his project titled “Cost Effective Solvothermal Synthesis of F-doped {TiO2} Nanomaterials for Photovoltaic Application,” guided and supervised by Prof. P. Ravirajan which earned him an exemplary grade of $A^-$.

I first came to know Mr. Chamara as an exceptional student in the Physics Honours Degree program and later as a demonstrator (on a contract basis) in the Department of Physics at the University of Jaffna. Throughout our association, I found him to be an intelligent, diligent, confident, and highly motivated individual with comprehensive knowledge across all branches of Physics. He possesses the capability to effectively teach and lecture on any branch of Physics, underscoring his versatility and depth of expertise.

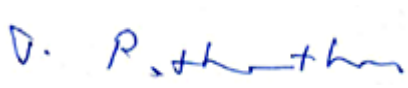

On a personal level, Mr. Chamara is a disciplined, industrious, and affable individual. He possesses remarkable talent, along with the intellectual capacity and resilience required to excel in a Masters program. His exceptional skills and profound knowledge equip him to successfully navigate any challenges he may encounter in his academic and professional journey.

I have been particularly impressed by Mr. Chamara's unwavering determination and intellectual curiosity. He is a rare combination of ambition, rigorous training, and humility, making him both an inspiring and approachable individual. I am confident that he will thrive in any graduate program he joins, bringing dedication and competence as a student and as a future professional.

I strongly believe that Mr. Chamara would be an excellent fit for the Post-Graduate Program. His skills, focus, and determination make him well-prepared to complete a master's degree within the stipulated time frame and to subsequently pursue a PhD.

It is with the utmost confidence that I recommend him for your program without reservation. Should you have any questions regarding his background or qualifications, please feel free to contact me.

Thank you
Sincerely yours

Dr. T. Pathmathas
