PhD in Atmospheric Physics (Colombo), B.Sc. Hons in Physics (Jaffna)
Senior Lecturer in Physics

To Whom It May Concern,

I am pleased to provide this reference for Mr. Bogahage Chamara Sandaruwan Sudasinghe, whom I have known during his undergraduate studies in Physics at the University of Jaffna and subsequently during his service as a Temporary Demonstrator in the Department of Physics.

Mr. Sudasinghe graduated with a Bachelor of Science Honours Degree in Physics from the University of Jaffna, obtaining Second Class (Lower Division) honours. Throughout his academic career, he demonstrated a strong interest in physics, particularly in experimental and applied research. His final-year research project, focused on the cost-effective solvothermal synthesis of fluorine-doped titanium dioxide nanomaterials for photovoltaic applications, reflected his excellent analytical skills, research aptitude, and commitment to scientific inquiry. His work contributed significantly to the development of improved dye-sensitized solar cells and was presented at an international conference.

Following his graduation, Mr. Sudasinghe served as a Temporary Demonstrator in our department from December 2024 to October 2025. During this period, he was actively involved in conducting undergraduate laboratory sessions, including General Physics, Electronics, and Honours practical classes. He carried out his responsibilities with diligence, professionalism, and a sound understanding of the subject matter. He was particularly effective in guiding students through experimental procedures and explaining complex concepts clearly.

In addition to his academic and professional strengths, Mr. Sudasinghe possesses excellent interpersonal skills, a positive attitude, and a strong work ethic. He is enthusiastic about teaching and has also extended his educational contributions through his online learning platform, making mathematics and physics accessible to a wider student community.

I strongly recommend Mr. Sudasinghe for admission to the Applied Physics programme at Jiangsu University of Science and Technology and for consideration for the scholarship. I am confident that he will excel in his studies and make valuable contributions to your academic community.

Yours sincerely,

A. ..... 29/04/2026
